Idea de K-Means Intuition: Elegir el número correcto de clusters

$$WCSS = \sum_{P_i \in Cluster \ 1} d(P_i, C_1)^2 + \sum_{P_i \in Cluster \ 2} d(P_i, C_2)^2 + \sum_{P_i \in Cluster \ 3} d(P_i, C_3)^2$$

Rebobinemos...
